

Offering Peace of Mind Through Information Security and Responsible Recycling

Bottom line POSRG can offer a higher ROI on your used POS equipment. How? POSRG can offer a fair market value for your used POS and IT equipment. Which depending on age and condition, is usually well above the scrap value that most other IT Asset Recovery Companies can offer.

POSRG is a leader in the remarketing of used POS equipment. All equipment that passes through our facility is either sold for reuse or recycled responsibly through our downstream network of certified R2 electronics recyclers.

Your company's most valued asset is your integrity and your public image. POSRG works hard to protect these by removing all traces of origin from every piece of equipment processed at our facility.

The world is an unpredictable place and you never know when life will throw you a curve ball. In case of an accident POSRG carries Full Professional and Environmental Liability Insurance.

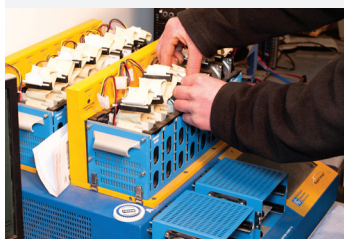

All purchases go through a comprehensive auditing and reporting process. Once completed you receive a report detailing make, model, serial number, HDD serial number, asset tag number, and condition for each piece of equipment. All asset tags, corporate branding, and marketing labels are removed, ensuring your equipment can never be traced back to your company.

LOGISTICS

- ▶ Full Truckload and LTL Shipments
- ▶ U-Pack It Program
- ▶ Secure Logistics
- ▶ White Glove Services
 - ▶ De-installation
 - ▶ On-site Audit
 - ▶ Professional Packing
 - ▶ On-site Data Destruction
